Art Unit: 1796

In view of applicant's amendment and response dated 9/2/08 following office action is final as necessitated by amendment. Examiner acknowledges cancellation of claim 2.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

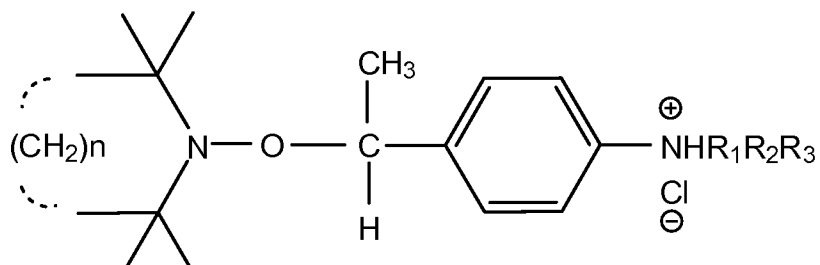

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 3-23 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The applicants have amended claim 1 (last line page 4), specifically definition of p, q and r from "0-10" to "0-1". The applicants have no specific support for 1. Although example discloses at least one species where p, q or r is 1, it is one specific compound whereas claims encompass wider range of compounds other than those in examples.

Art Unit: 1796

Claim Interpretation – based on newly amended claims, the simplest formula which reads on the instant independent claims is as follows:

With that in mind following rejection is hereby made:

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 1, 11-15, 17-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over GIANNELIS et al. *JACS* in view of MIURA et al (*Macromolecules* **1999**, 32, 8356-8362).

The discussion of the teachings of the GIANNELIS from paragraph 5 of the office action dates 6/2/08 is incorporated here by reference.

The difference between the instant invention and the teachings of GIANNELIS is the recitation of other substituents on the nitrogen that would still afford controlled free radical polymerization. Specifically, of interest is substitution in figures 3a-c of MIURA.

Art Unit: 1796

The modification that would utilize such substituents would have been obvious in GIANNELIS since (CH₃)-CH-phenyl is not the part of the molecule that initiates the polymerization. In addition, the end unit is still phenolic therefore when treated with NMe₃ as in reaction scheme 1 of GIANNELIS it would still produce phenyl substituted with quaternary ammonium compound.

Allowable Subject Matter

5. Claims 3-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's arguments are considered moot since the prior art of GIANNELIS is restated in view of MIURA.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1796

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
